Subject Index

A

Account, cost, classification ... 424
Acid slags, fast analysis of ... 150
Air, cupola, raw material ... 111
Air pollution ... 385
Aluminum alloys
  Correlation of cooling curve data with casting characteristics ... 489
  Fluxing of ... 307
  Grain refining of ... 509
  Metallography of ... 249
Aluminum analysis, residual in white cast iron ... 320
Aluminum, determination of, in cast steel ... 243
Aluminum, effect of, on toughness of cast steels ... 269
Analysis of acid slags ... 150
Annealing, controlled atmosphere, of malleable iron ... 562
Annealing, first stage, of black-heart malleable iron, effects of temperature and silicon content on ... 173
Annealing rate of malleable iron, effect of gases on ... 563
Atmosphere, melting, effect of, on valve bronze ... 257
Atmosphere, reducing, gas-fired melting of copper-base alloys in ... 558
Austenitic grain size of cast steel ... 392

B

Bibliography on
  Annealing of malleable iron ... 564
  Austenitic grain size of cast steel ... 396
  Blast humidity in cupola operation ... 130
  Gases in melting brass and bronze ... 600
  Gating ... 88
  Graphitization of white cast iron ... 327
  Growth and scaling characteristics of cast iron ... 471
  Heat transfer ... 314
  Inclusions in cast steel ... 247
  Insulating sleeves, pads and risers ... 207
  Metallography of cast magnesium alloys ... 147
  Risering castings ... 75
  Toughness of cast steels ... 280
  pH in relation to foundry sand ... 220
  Plastic binders for foundry sand ... 365
Binders, plastic, for foundry sand ... 357
Black-heart malleable iron
  Effects of temperature and silicon ... 175, 176
  Influence of silicon content on critical temperature range during slow cooling of ... 549
Blast
  Control of moisture in cupola ... 114
  Effect of moisture in cupola ... 164
  Humidity as a factor in cupola operation ... 111
  pressure, cupola ... 129
Bleeding tests ... 100, 339
Boror effect of, on
  Cast iron, structure and properties of ... 475
  Cast monel, properties of ... 543
Brass and bronze melting practice ... 354
Brass, 85-5-5-5, melt quality and fracture characteristics of 433
Bronze foundry practice ... 45
Bronze, valve, effects of melting atmosphere, time at temperature and degasification on properties of ... 257
Buckle, casting defect ... 92
Burnt-in sand ... 614

C

Carbon, effect of, on cast monel ... 539
Carbon equivalent, properties of cast iron in relation to ... 24
Carbon equivalent value ... 25
Carbon pickup ... 112, 113, 118
Casting procedure for cast iron ... 478
Casting surface finish ... 521
Cast iron
  Ductile ... 576
  Effect of boron on structure and properties of ... 475
  High-silicon, growth and scaling characteristics of ... 459
  Nodular graphite ... 576
  Pearlitic and ferritic ... 51
  Properties of, in relation to the carbon equivalent value 24
Centrifugal casting
  aluminum alloys ... 602, 605
  foundry practice ... 622
  gating ... 622, 625
  machine ... 605
  magnesium alloy ... 605
  Opinions on ... 604
  spinning speeds ... 624, 626, 611
  sprue design ... 623
Centrifugal castings
  Advantage of ... 603, 604
  Macrostructure of ... 605
Centrifugally cast steel tubes, hot tears in ... 450
Centrifuging method of casting ... 602
Chill

Dust, silica, settling rate in still air 282

E

Effluent cupola gas
  composition 346
  temperature 344, 346
85-5-5-5 brass, melt quality and fracture characteristics of 433
Electric analogy method for heat transfer 313
Elevated temperatures, properties of steel sands at 89
Estimating cost of castings 423
Etchants for magnesium specimens 134
Exothermic anti-piping compounds for steel castings 332
Expansion of molding sand
  Characteristics 96
  Curve 405
  Test 405, 533

F

Factor card in timestudy 304
Ferritic cast iron 51
Flame hardening of pearlitic malleable iron 368, 375, 376
Flasks, molding 606, 607
Fluid dynamics 76
Fluidity
  defined 118
  aluminum alloys, of 495
  gray iron, of 118, 123, 126
Flux for aluminum 307, 612
Fluxes in melting brass 355
Fracture characteristics of brass 433–435
Freezing process mechanism for castings 45
Furnace efficiency, indirect-arc 597
Furnace, melting, graphite resistor 157

G

Gas-fired melting of copper-base alloys in a reducing atmosphere 558
Gas removal in fluxing aluminum 308
Gases, effect of, on annealing rate of malleable iron 563
Gases in melting copper-base alloys 48, 354, 597
Gate design 85
Gating
  centrifugal casting 622
  Principles of 76, 87
  Step 69
  System requirements 76
  Top, objections to 69
Good housekeeping 282
Grain boundaries, revealing, in cast magnesium 145
Grain growth inhibitors for steel 269
Grain refiners for steel 269
Grain refining of aluminum alloys 509
Grain size
  austenitic, of cast steel 392
  in cast alloy steels 588
  of aluminum, determining 252
  procedure for modifying, in aluminum 511
Graphite resistor melting furnace 157
Graphitization of
  gray cast iron by heat treatment 51
  white cast iron, influence of rate of heating on first stage 497
  white cast iron, effects of deoxidation treatments on 315
Graphitization, secondary, of gray iron 51–53
Graphitizing behavior of white iron 226
Graphitizing rate of white iron 227
Gray cast iron, graphitization, by heat treatment 51
Green strength of core mixtures 386
Green strength of molding sand 360
Growth mechanism for cast iron 459

H

Hardening, surface, of pearlitic malleable irons 367
Hardness, mold, effect of 523
Heat developed by 1 lb carbon 348, 349
Heating, rate of, influence of, on first stage graphitization of white cast iron 497
Heat in the cupola, production and consumption of 343
Heat transfer 100, 310
Heat treatment
  graphitization of gray cast iron by 51
  magnesium, of 139
  malleable iron, effect of slag type on 222
Hot compressive strength of sand 90
Hot cracking, resistance to 494
Hot tears in thick-walled centrifugally cast steel tubes 450
Human relations 284
Humidity of blast as a factor in cupola operation 111
Hygiene in foundry 567

I

Impact test for cores 388, 389
Inclusions
  sulphide, effect of deoxidizers on structure of sulphide 233
  sulphide, in steel 270
  sulphide, type 3, formation of in cast steel 247
  type 2, significance of, in cast steel 245
  white cast iron, in 317–319
Indirect-arc furnace melting brass and bronze 597
Induction hardening of pearlitic malleable iron 368–376
Inoculation, response to 123

Insulating and exothermic compounds for steel castings .. 332
Insulating sleeves, pads and risers for non-ferrous casting .. 204
Insulators or liquidizers for risers 73
Iron-carbon diagram 52
Iron, effect of, on cast monel 540

K

Kathabar equipment for moisture control in cupola blast 114
Kish 24
Knock-out of core 364
Knoop microhardness tests 482–483

L

Labor turnover 284
Lanz Perlit process 43
Lead, effect of, on cast monel 541
Lead, effect of, on properties of copper-base alloys 49
Lead poisoning 569
Light metal casting design 378, 409
Lightup and operating schedule for cupola 171
Lightup procedure for cupola 114
Lining materials, cupola 168
Lining procedure, cupola 167

M

*Macro-etching technique for steel 589
Magnesium alloys, cast, metallography of 133
Magnesium, cast
cerium in 138
manganese in 138
silicon in 138
zinc in 138
Magnesium casting design 378
Magnesium, effect of, on cast monel 540
Magnesium, heat treatment of 139
Magnesium treatment for nodular graphite cast iron 577
Maintenance in mechanized foundry 263
Maintenance of
core ovens 201
dust collectors 282
patterns, wood and metal 546
Malleable iron,
black-heart, effects of temperature and silicon content on first stage annealing of 173
controlled atmosphere annealing of 562
effect of slag types on heat treatment of 222
influence of silicon content on critical temperature range during slow cooling of black-heart 549
pearlitic, surface hardening of 367
Maurer diagram for gray cast iron 35
Melt procedure for monel 535, 538
Melt quality defined 49
Melt quality of brass 433, 434
Melting brass and bronze 354, 433, 597
Melting equipment for aluminum 611
Melting furnace, graphite resistor 157
Melting, gas-fired, of copper-base alloys in reducing atmosphere 558
Melting procedure for white cast iron 316
Melting rate, gray iron 118, 127
Melting time at temperature, effect of, on valve bronze .. 257
Melting valve bronze 257
Metallographic examination of brass 439, 445–448
Metallographic specimens, preparation of 133
Metallographic study of high-silicon cast iron 468
Metallography of aluminum casting alloys 249
Metallography of cast magnesium alloys 133
Micron defined 282
Microradiographic examination of brass 439, 442–445
Microstructure features of cast iron with boron 481–482
Microstructure of aluminum 512, 516–517
Moisture, effect of, in molding sand 523
Moisture in cupola blast 112
Mold assembly 609
Mold drying unit, portable 200, 201
Mold hardness, effect of 523
Mold ovens 81
Mold preparation 618
Mold wash for aluminum 612, 614
Molding machine 609
Molding sand, effect of moisture 523, 524
Molding sand for brass 521
Molding sand mixture for aluminum 612–616, 621
Molding sand, rat-tail, producing 526
Molding unit, 4-man, developing standard data tables for 287
Mold-metal interface 92
Molds, permeable vs impermeable 78
Monel, effect of
boron on cast 543
carbon on cast 539
composition on properties and structure of 535
copper on cast 537
iron on cast 540
lead on cast 541
silicon on cast 535, 536
sulphur and magnesium on cast 540
zirconium on cast 542
Monel, melt procedure for 535, 538

N

Nodular graphite cast iron 576
Nodular graphite cast iron properties 581–585
Non-destructive examination of welds 2
Normalizing welds 9

O

Oven, core baking
car-type 189
combination vertical and horizontal 196
conveyor 192
core, maintenance of 201
dielectric 186, 363, 365
double strand horizontal 198-199
drawer-type 187
flight-conveyor-type horizontal 198–199
high speed continuous 198–200
pit-type 190
rack-type 188–189
rolling drawer-type 187
shelf-type 187
single strand horizontal 197–198
temperature distribution in 183–184
vertical 193–194
Ovens, modern foundry core and mold 181
Oxide removal in fluxing aluminum 307
Oxygen content of white cast iron 315

P

Pattern Classification 292
Pattern equipment, information needed for production of 456
Pattern maintenance 546
Pattern storage 547
Pearlitic cast iron 51
Pearlitic malleable iron, surface hardening of 367
Penetration, metal 618
Personnel, attracting and keeping 281
pH defined 210
pH vs sand properties 210
Phenol resin binders 359
Phenolic binders 358
Phosphorus in gray iron 35
Photomicrographs of aluminum 251–255
Photomicrographs of magnesium 135
Plaster for insulating sleeves, pads and risers 205
Plastic binders for foundry sand 357
Poisoning, lead 569
Polymerization of plastic binders 358
Pouring bowl 608
Pouring box design 82
Pouring of molten metals 81

Pouring temperature, effect of, on brass 523
Process labor defined 416
Properties of
cast iron in relation to carbon equivalent value 24
steel sands at elevated temperatures 89
various liquids 77
Psychrometer, sling 114
Pyrometer
expansion type 609
optical, disappearing filament 114

R

Radiation losses in cupola 344–348
Rate of heating, influence of, on first stage graphitization of white cast iron 497
Rat-tail casting defect 92, 526
Reducing atmosphere, gas-fired melting of copper-base alloys in 558
Refractory lining of graphite resistor melting furnace 159
Refractories, studies in cupola 165
Relaxation allowances 292
Repair welding of castings 2
Riser shapes 75
Riser, Williams atmospheric 48
Riser, dimensioning 66, 70–75
Riser, insulators and liquidizers 73
Risers, positioning 66
Risering castings 66
Runner design 85

S

Safety in the foundry 283
Sand mixing 361
Sand, molding
aluminum, for 612–616, 621
brass, for 521
rat-tail producing 526
scabbing tendencies of 400
Sand, plastic binders for foundry 357
Sand properties vs pH 210
Sand-metal interface 72
Sands, steel, properties of, at elevated temperatures 89
Scab, casting defect 92
Scabbing tendencies of molding sand 400
Scaling tests for high-silicon cast iron 465
Secondary graphitization of gray iron 51
Shrinkage defects 71
Shrinkage, dispersed, elimination of 69
Sievert's rule 48
Silica dust, action of 282
Silicon cast iron, high, growth and scaling characteristics of 459
Silicon content and temperature, effects of, on first stage annealing of black-heart malleable iron 173
Silicon, effect of, on cast monel 535–536
Silicosis 281
Silicosis, cause of 568
Slag composition 119
Slag, cupola, studies 384
Slag types, effect of, on heat treatment of malleable iron 222
Slags, fast analysis of acid 150
Slag sampling 151
Solidification contraction 66–67, 74
Solidification curves for aluminum 491
Solidification studies 100
Spectrophotometric examination, preparing samples for .. 151
Spectrophotometry, reflective, determines FeO-MnO-Cr 150
Sprue 607
Sprue design 78, 83
centrifugal casting 623, 624
Stack, cupola, capacity and lining contour 169
Standard costs in the foundry 415
Standard data tables for 4-man molding unit 287
Steam bronze
composition 45
pouring temperatures 45
Steel
austenitic grain size 392
cast alloy, grain size 588
cast, high hardenability, toughness of 269
Steel castings
in welded assemblies 1
insulating and exothermic anti-piping compounds for .. 332
Stoke's Law 282
Strain gages 380, 381
Stress-strain diagram for
cores 388
molding sands 405, 407
Structure diagram for gray iron 41, 42
Sulphide inclusions in cast steel 233
Sulphide inclusions, Type 3, formation of, in cast steel .. 247
Sulphur, effect of, on cast monel 540
Surface finish, casting 521

T

Tapping temperature, gray iron 122–127
"Temper" graphite 51
"Temper brittle" range for steel 269
Temperature distribution in core baking oven 183, 184
Temperature, effects of, and silicon content on first stage annealing of black-heart malleable iron 173
Temperature gradients 68
Thermal analysis, apparatus for 490
Thermit welding 2, 10, 16–18
Thermosetting resin binders 357
Titanium, deoxidation with, of white cast iron 322
Toughness of high hardenability cast steels, effect of aluminum and vanadium on 269

U

Urea-formaldehyde core binders 358
Urea resin binder 357

V

Valve bronze
composition of 259
properties of 257
Vanadium, effect of, on toughness of cast steels 269
Variable elements defined 287
Veining 92
Vision of employees 283

W

Water-gas reaction in cupola 112
Wash, mold, for aluminum 612, 614
Washburn-type heads 2
Welded assemblies, steel castings in 1
White cast iron
influence of rate of heating on first stage graphitization of 497
some effects of deoxidation on graphitization of 315
White iron, graphitizing behavior of 226
Widmanstätten structures 590
Williams atmospheric riser 48

Z

Zirconite brick 99
Zirconium, effect of, on cast monel 542
